

# **UPDATE: Immediate Root Hall Energy Conservation efforts to continue**

## **IMMEDIATE: ROOT HALL Electricity Guidelines**

**The cause of the power failure has been determined and the necessary steps are being taken to purchase and install the necessary parts to make the required repairs. As a result, the Joint Deli will remain closed until further notice and all energy conservation measures will remain in place.**

Due to a failure with the transformer and switch gear in Root Hall last Sunday, the remaining transformer is operating at near capacity, and reduced energy consumption is necessary to prevent a system failure.

As a result, we ask Root Hall occupants to take the following actions beginning WEDS, 19 October:

- Power down and unplug any non-essential equipment (for example: coffee pots, microwaves, TVs and small refrigerators)
- Power down all PCs, monitors and printers when departing for the day

Additionally, we will close the Joint Deli in Root Hall beginning Wednesday, October 19th until further notice. Please use the Bowling Alley, Golf Course, Café Cumberland or Subway for lunch.

Thank you for your cooperation and patience.
