

Traffic, ground study ongoing here

By Thomas Zimmerman 13 December 2018

Two projects -- a traffic study and ground study -- are currently underway as Carlisle Barracks continues to gather information for a potential construction project here.

Two projects -- a traffic study and ground study -- are currently underway

as Carlisle Barracks continues to gather information for a potential construction project here.

Traffic measuring devices and cameras have been placed at multiple intersections and parking areas to analyze traffic on and off post. The study is scheduled to continue until Dec. 21.

Near Collins Hall, a team is drilling holes to analyze the composition of the ground to find levels of bedrock and other materials that could affect construction. The team began work Dec. 12 and will work 6 days a week until Dec. 21. They will resume work Jan. 3 with an estimated completion date of March 4. Work on weekends will not start until 8 a.m.
