

Carlisle Barracks to celebrate Earth Day April 30

By Thomas Zimmerman 18 April 2018

A promotional graphic for Army Earth Day 2018. The top half shows a soldier in camouflage gear standing next to a military helicopter in a forest. The bottom half shows a soldier and a young boy planting a tree. The text 'ARMY EARTH DAY 2018' is at the top. Below it, 'SUSTAIN THE MISSION' is accompanied by a globe icon, and 'SECURE THE FUTURE' is accompanied by a leaf icon. At the bottom, it says 'ARMY READINESS DEPENDS ON IT' with the U.S. Army star logo and 'U.S. ARMY' text. Contact information for the Assistant Secretary of the Army, Installations, Energy & Environment is provided at the bottom right.

U.S. ARMY

The Army is a leader among Federal agencies in protecting, conserving, and restoring the environment. Our participation in Army Earth Day aims to inspire awareness and appreciation of the environment and how it sustains our warfighting readiness miss

Carlisle Barracks will celebrate Earth Day with a series of events April 30 at

the Delaney Community Center, from 9 to 11 a.m. The celebration will feature Bert Myers from Department of Environmental Protection talking about aquatic wildlife; the post fire department will discuss fire safety, and there will be presentations on the importance of recycling and each child who attends will be provided a flower to take home.

Since the 1970s, the United States Army has joined the Nation in celebrating Earth Day. Army Earth Day is an opportunity to renew our commitment to sound environmental stewardship of the lands entrusted to us; the lands where our Soldiers, Families and Civilians train, live, and work.

"Our installations are a critical training resource," said Jordan Gillis, Assistant Secretary of the Army for Installations, Energy and Environment. " We must maintain and conserve that resource to ensure the Army is ready and capable of accomplishing its warfighting mission now and into the future."
