All the information you want to know about local vaccine clinics

This article addresses the following—

- FDA full authorization of Pfizer
- What can active-duty military expect about COVID vaccination
- What can TRICARE beneficiaries anticipate
- Moderna vaccine clinic
- Who's eligible for COVID booster shots

On August 23, the Pfizer vaccine received full authorization for individuals 16 and older. Dunham Army Health System expects to receive a limited supply of the Pfizer COVID vaccine in September and has scheduled Pfizer vaccine clinics at the LVCC on two Fridays in late September. The Sept. 17 and Sept. 24 clinics will prioritize active-duty military members, in accordance with the guidance issued by the Secretary of Defense on August 25.

Currently, family members, retirees, and youth 16-18 years old, can find

Pfizer COVID vaccine available at regional providers. Use Vaccines.gov to find facilities that offer the Pfizer vaccine; multiple facilities within 10 miles of Carlisle Barracks currently have appointments available. Note, that Pfizer vaccine is emergency-use authorized for kids 12-15 years of age.

Due to the rising COVID cases and the highly contagious Delta variant, Dunham Clinic at Carlisle continues to provide the Moderna COVID vaccine – ***on an appointment-only basis***. See the Moderna Safety article, linked on this page, to understand the research behind the development of the Moderna vaccine, which is authorized under emergency use for individuals 18 and older. Moderna vaccine clinics are held at Dunham every Tuesday from 8 am to 1 pm through September 14. TRICARE beneficiaries – families and retirees – can schedule a COVID vaccine appointment by calling the clinic (717.245.3400), using TRICARE Online, or using the COVID appointment app, linked on this page. Carlisle Barracks civilian and contract employees can schedule with the app.
