

Service dogs a highlight of Disability Employment Awareness program

Service dog demonstration a highlight of National Disability Employment Awareness program

The

Susquehanna Service Dogs came to the McConnell Youth Center as part of the National Disability Employment Awareness program Oct. 15. Post youth took part in an interactive training session for a 10-month old black lab named Cocoa. The service dogs spend about a year taking part in in-home training by volunteers before being matched up a child or adult with a disability to become more independent. The observance is sponsored by Dunham U.S. Army Health Clinic.
