

Put down the phone, stop distracted driving #ItCanwait

#ItCanWait Put down the phone, stop distracted driving

“We all know that talking on our cell phones while driving is distracting, but that doesn’t stop most people from continuing to do it,” said Chris McCormick, Carlisle Barracks Safety Manager. “This effort is intended to educate our community about the dangers of cell phone use and other distractions while driving. We hope that once people see the statistics and realize the danger involved, they

will change their driving habits to help protect themselves, their families, and others on the road.”

In 2013, 3,154 people were killed in crashes involving a distracted driver and an estimated additional 424,000 were injured in motor vehicle crashes involving a distracted driver. That same year, eleven percent of fatal crashes were reported as distraction-affected crashes.

While anything that takes your eyes off the road, hands off the wheel, or mind off the task of driving is a hazard, there is heightened concern about the risks of texting while driving because it combines all three types of distraction – visual, manual and cognitive.

The national distracted driving effort focuses on ways to change the behavior of drivers through legislation, enforcement, public awareness and education – the same activities that have curbed drunk driving and increased seat belt use.

“Every driver on Carlisle Barracks has a role in this effort,” said McCormick. “However, we especially want to reach out to parents with teen drivers because we know that statistically, the under-20 age group had the highest proportion of distracted drivers involved in fatal crashes.”

Our goal is simple – save lives by getting drivers to remember that “One Text or Call Could Wreck It All.”
