Recruiting company, AHEC team up for National Army Interactive Exhibits

Two Army Packbots will be on display Aug. 18 and 19 at the Army Heritage and Education Center for team obstacle course. Participants will race Packbots through mini obstacle course.

Two National Army interactive exhibits will be located at the Army Heritage and Education Center, 900 Soldiers Dr. Carlisle on Aug. 18

and 19 from 9 a.m. to 4 p.m.

The two exhibits; a Robotics exhibit which will allow participants to operate and race Army Packbots through a mini obstacle course, and an Aviation simulator, which includes two motion simulators, featuring an Apache helicopter flight training simulator, will be coupled with other Army equipment to highlight some of the Army's technologies.

"I am really looking forward to the Aviation simulator," said Capt. Bill Hammac an Army pilot and commander of the Carlisle recruiting company, "I can address any questions someone might have about Army Aviation. I love flying and where else can you receive free training and get paid to do what you love."

Some exhibits will require the participants to be at least 48 inches tall, minimum weight of 100 lbs and at least 16 years of age. Visitors of all ages will enjoy watching or participating in the days activities.

John Giblin, Director of Visitor and Education Services at the US Army Heritage and Education said, "The Center is pleased to act as host for these Army exhibits. To enhance this Army experience we will be offering tours through the Heritage Center and our Army Heritage Trail will be open for the

public to explore at their leisure throughout the day."
