

Traffic changes coming to Claremont Road gate

Traffic changes coming to Claremont Road gate

Starting April 26, Jim Thorpe Road from Claremont Road to the entrance of the Meadows, will be closed to traffic until approximately June 1 so that it can be widened and repaved allowing utilization of the new access control points. All traffic to Carlisle Barracks, the Meadows and the golf

course will need to enter through a temporary road that will be marked. Inclement weather could delay the start or end date of the project.

Upon turning off of Claremont Road, there will be signage directing traffic to their destination:

- Meadows and Golf Course traffic will turn left and proceed as normal
- Carlisle Barracks traffic will turn right to the new access control point

Upon approaching the new access control point there will be three options:

- Visitors without a DoD Decal will enter the left lane, where they will be directed to the inspection area
- DoD decal holders will enter the center lane
- Buses and trucks will use the right lane

Exiting traffic for the Meadows and Golf Course will also be affected All traffic departing the Meadows and Golf Course must travel to and process through the access control point, following the lane assignments above. Once through the checkpoints, they can make a left or right to exit the installation. Residents will need to show ID at the access control point.
