

Lamberton student diagnosed with H1N1 virus

Lamberton student diagnosed with H1N1 virus

A student at Lamberton Middle School in Carlisle has been diagnosed with the swine flu.

A letter was sent to parents in the Carlisle Area School District this afternoon from Superintendent Mary Kay Durham.

"The Pennsylvania Department of Health recommends that individuals who develop the flu should remain at home for at least 7 days after the onset of illness. If they are still ill after 7 days, they should remain at home until symptoms have resolved for at least 24 hours," the letter reads. "In this case the individual has followed the advice of the Pennsylvania Department of Health."

For additional information please refer to www.health.state.pa.us and/or www.cdc.gov/swineflu or the Carlisle Area School District website at <http://www.carliseschools.org/>

The student's identity is being kept confidential in accordance with federal privacy laws.
