

## CDC operations to shift to McConnell Center during fire alarm install

By Thomas Zimmerman 29 August 2018

*The upgrades will require CDC operations to shift to the McConnell Youth Center, located at 459 Bouquet Road starting Sept. 4 and lasting until Dec. 31.*

The Moore Child Development Center will receive an updated fire alarm and mass notification system as part of the post-wide upgrades to these systems.

The upgrades will require CDC operations to shift to the McConnell Youth Center, located at 459 Bouquet Road starting Sept. 4 and lasting until Dec. 31. Operating hours will remain the same, 0630-1730, Monday-Friday. Hourly care will be offered on Tuesdays and Thursdays from 1130-1530. The phone number to reach the front desk is 717-245-4555.

This new system will enable a number of new features for the safety of our children and employees. In addition to providing greater reliability as a new system, the system will provide audible alarms, a direct connection to the Installation Operations Center and the Police desk for communications, a carbon monoxide gas detection and sensors that tell first responders exactly what detector or pull station has been activated, which will save

time in the event of an emergency.

If you have any questions regarding the relocation please contact the CDC at (717) 245-3701.
