

Contractor to install fence for new academic building project

By Curt Keester 24 May 2020

Representatives from the Army Corps of Engineers, the Directorate of Emergency Services and the Directorate of Public Works survey the proposed fence line for the new Army War College academic building project May 21, 2020.

When complete, the proposed fence line near Collins Hall will resemble the track in red, and the line in blue will approximate the temporary parking for faculty, students and staff.

CARLISLE BARRACKS, Pa. (May 22, 2020) - The Carlisle Barracks community will soon notice Army Corps of Engineers contractors on Post as they begin preparing the future construction site of the new Army War College academic building.

The general contractor, Manhattan Construction Co., will tentatively begin installing a perimeter fence near Collins Hall on Tuesday, May 26. The project will not close any roads or disrupt parking at this time.

Later in June, contractors will install gates to limit access to Wright Ave., Liggett Rd., and a portion of Butler Rd. Accessible and designated parking will move behind Collins Hall, and contractors will construct two temporary parking lots for faculty, students and staff; one on the median between Liggett and Pershing Roads, and one behind the Vet Clinic between Wright

Ave. and Liggett Rd.

The Directorate of Public Works will close and remove the dog park between Wright Ave. and Liggett Rd. on Thursday, May 28. Residents, and their dogs, are encouraged to temporarily use the soccer field located across Letort Spring Run from the Tiki Bar until a new dog park is constructed near the McConnell Youth Center. Please bring plastic bags and pick up any messes to keep the field clean for everyone to enjoy.

Residents living along Brooke Ave. and Pershing Rd. will have access to these roads throughout the project, which is expected to be complete in April 2023.
